

DWA_03.5 Knowledge Check_DWA3.2

1. User story(ies) in Gherkin syntax for the "+" button.

Increasing the Tally Count

As a user

I want to be able to increase the tally count by clicking the "+" button

So that I can keep track of the count

Story: Increment the tally count by one

Given the tally count is currently 5

When I click the "+" button

Then the tally count should be 6

Story: Increment the tally count multiple times

Given the tally count is currently 3

When I click the "+" button 4 times

Then the tally count should be 7

2. User story(ies) in Gherkin syntax for the "-" button.

Decrease Tally Count

As a user

I want to be able to decrease the tally count by clicking the "-" button

So that I can adjust the count when needed

Story: Decrement the tally count by one

Given the tally count is currently 8

When I click the "-" button

Then the tally count should be 7

Story: Decrement the tally count multiple times

Given the tally count is currently 10

When I click the "-" button 3 times

Then the tally count should be 7

Story: Prevent tally count from going below zero

Given the tally count is currently 1

When I click the "-" button

Then the tally count should remain as 0
